

PENINSULA HYDROPONICS' THE BUZZ

We'll help you grow!

TOP NEWS OF THE MONTH

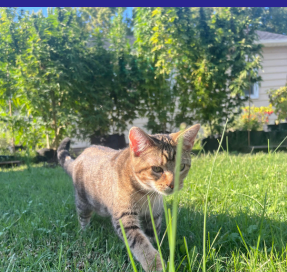

BUT FIRST, IPM

We recommend that you continue on with your established IPM schedule until week 4 or 5 of flowering, when the buds have more fully formed. Some products, such as Lost Coast Plant Therapy, The Amazing Doctor Zymes Eliminator, Athena IPM and Green Cleaner can be used safely up until the day of harvest if needed. It is best practice to designate separate days for spraying these IPM products and Monterey B.t. as the active ingredient within B.t. is a beneficial bacteria.

MONTEREY B.T...BECAUSE THEY HERE

Come by ASAP to grab a bottle of Monterey B.t.! At this point, it is time to begin treating all outdoor crops with B.t., weekly, in order to prevent caterpillars from wreaking havoc. The type of caterpillar that causes the damage leading to botrytis (bud rot/grey mold) have officially arrived in our region. The moths fly at night -- so, you will not see them. Prevention is key! Don't let your Cannababe become a nasty girl, this August!

MONTEREY B.T.

>>> BECAUSE THEY HERE...

Organic insect control for caterpillar-type insects, without harming birds, earthworms, honeybees, or ladybugs.

Once caterpillars eat treated foliage, they will immediately stop feeding and damaging plants!

MIKE'S PRO-TIP

Treat your outdoor cannabis plants, weekly, with Monterey B.t. from August until Harvest. Use a wetting agent/surfactant, such as Coco-Wet, in order to attain a more complete and even coverage over your canopy and to help stretch your bottle of B.t.

Monterey Bt Liquid Concentrate is an OMRI-listed biological insecticide, whose active ingredient is the beneficial bacteria *Bacillus thuringiensis*. This biopesticide works by introducing bacterial spores and toxins into the body of insect larvae as it feeds on foliage. These toxins quickly disrupt, and soon completely stop, normal digestive functions of the pest insect. The infected larvae will cease eating within minutes and fully succumb to the effects of the BT and die within 2-5 days. Monterey B.t. may be applied up to and on the day of harvest.

HOW TO MIX AND APPLY:

- Begin applying B.t. in the last week of July/first week of August and repeat at weekly intervals to maintain control.
- Can be applied with a hand sprayer or a hose-end sprayer.
- Always shake or stir thoroughly before use.
- Partially fill sprayer with water before adding the application rate amount of product, then mix in product thoroughly and add remaining amount of water.
- For fruiting/flowering plants, mix 2 fl oz per 3 gallons of water (4 tsp per gallon) for a hand sprayer and apply to all plant foliage to cover an area of 1,000 square feet.
- Spray leaf surfaces thoroughly, top and bottom, for complete control. Reapply after heavy rains.
- Agitate regularly while spraying.
- Use all of spray mixture within 24 hours

FLOWERING CANNABIS OUTDOORS

MIKE'S PRO-TIP

Around Day 10 of Flower, hit your plants hard with a "PK Boost" -- a high phosphorous and potassium fertilizer. This encourages more bud sites to form on your plant. *Flower Finisher by GreenGro is a wonderful example.*

»» SHE'S JUST A LITTLE HIGH MAINTENANCE

- BY THE END OF JULY/EARLY AUGUST, YOUR OUTDOOR CANNABIS PLANT SHOULD BEGIN BUDDING.
- FEED YOUR PLANT A BLOOM FERTILIZER ACCORDING TO THE INSTRUCTIONS/FEEDING CYCLE OF THE NUTRIENT LINE YOU ARE USING. YOU WILL DO THIS FOR THE FIRST 4-5 WEEKS OF FLOWER.
- CONTINUE YOUR ESTABLISHED IPM SCHEDULE AND ADD MONTEREY B.T. TO YOUR REGIMEN IN ORDER TO PREVENT CATERPILLARS.
- ONCE A WEEK, FEED MICROBES OR COMPOST TEA FOR ENHANCED SOIL AND PLANT GROWTH. YOU CAN ALSO FEED YOUR MICROBES AND SOIL WITH A SWEETENER (E.G. GREENGRO NATURE'S BRIX), ONCE A WEEK.
- ONCE YOU GET TO WEEK 5 OF FLOWER, YOUR PLANTS WILL NEED A LOT MORE PHOSPHOROUS AND POTASSIUM. TO ACHIEVE DENSITY AND FLAVOR, ADD A PK BOOST TO YOUR FEEDING REGIMEN FOR WEEKS 5-8, MAYBE EVEN 9-10, DEPENDING ON THE STRAIN.
- IN ORDER TO OPTIMIZE FLAVORS, STOP FEEDING 2 WEEKS PRIOR TO HARVEST IN SOIL.

OUTDOOR FLOWERING MUST-HAVES:

- Bloom Fertilizer
- PK Boost
- Pride Lands Brix
- Recharge
- Green Cleaner
- Lost Coast Plant Therapy
- The Amazing Doctor Zymes
- Monterey B.t.
- Trellis Netting
- Bamboo Stakes

PENINSULA HYDROPONICS' GENETICS MENU

4

POLLEN DONOR

MIKE'S FEMINIZED PHOTOPERIOD SEED VAULT

The OG Collection 2.0*

*All of the genetics contained within this line have been crossed with FaceOff OG Kush.

FaceOff OG Kush, is a 90's CULT-CLASSIC! A strain not intended for the lightweights, she is revered for her overwhelmingly unique flavor and a skull crushing high - that starts in the head and face, thus the name. Her dense, resinous lime-green buds are covered in red pistils and give off a sweet, earthy, and piney odor. Original genetics via Archive Seeds.

**FACEOFF
OG KUSH***

**FORBIDDEN
FRUIT***

Few strains are as appropriately named as **Forbidden Fruit**, a tantalizing hybrid born for flavor! This strain is a mouth watering marriage of **Cherry Pie** and **Tangle** - How could you go wrong?

**BLUE
ZUSHI***

Blue Zushi is the modern definition of purple candy gas. She is incredibly frosty with her own signature morphology. As she fades into a gorgeous dark purple, her terps become so sweet and loud that they cut through most everything.

BREEDER'S CUT

**PERMANENT
MARKER***

Permanent Marker is a potent strain that leaves a lasting effect. Boasting a minty aroma with hints of pepper, gas, and cookies, as well as sky-high THC levels, it's no wonder this strain has become so popular.

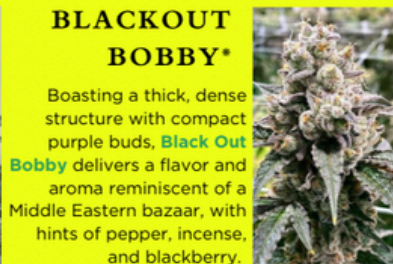

**BLUEBERRY
SUGAR**

Hailing from the blockhead buds lineup, **Blueberry Sugar** is a cross of **Blueberry**, **Cream Candy**, and **Blueberry**. Boasting a happy effect is happiness paired with some really nice relaxation.

**UNICORN
POOP***

Originating from the crossbreeding of **GMO** and **Sophisticated Lady** strains, **Unicorn Poop** boasts a remarkable THC content and flavor profile - a harmonious mix of sweet, sour, and earthy tones.

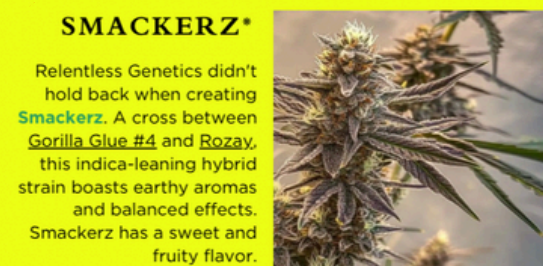

**BLACKOUT
BOBBY***

Boasting a thick, dense structure with compact purple buds, **Black Out Bobby** delivers a flavor and aroma reminiscent of a Middle Eastern bazaar, with hints of pepper, incense, and blackberry.

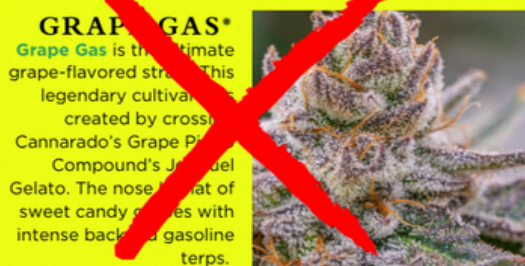

**TRIANGLE
MINTS***

Triangle Mints, ALSO KNOWN AS THE WEDDING CAKE CUT, is a resin-coated, GORGEOUS green Queen known for her DENSE BUDS. She is STICKY, SWEET and FUEL all at once.

SMACKERZ*

Relentless Genetics didn't hold back when creating **Smackerz**. A cross between **Gorilla Glue #4** and **Rozay**, this indica-leaning hybrid strain boasts earthy aromas and balanced effects. **Smackerz** has a sweet and fruity flavor.

GRAPES GAS*

Grape Gas is the ultimate grape-flavored strain. This legendary cultivar was created by crossing Cannarado's **Grape Pie** with Compound's **Juicy Gelato**. The nose is that of sweet candy comes with intense black and gasoline terps.

LIMITED STOCK

**TRICHO
JORDAN**

Tricho Jordan, a cross of **Chimera #2** and **#3**, shows off deep purple and emerald green hues, bedazzled in a coat of sparkling trichomes. Specifically bred for maximum trichome production and hash washing.

APRIL'S GARDEN RECIPES

Zucchini Bread

>>> THIS ZUCCHINI RECIPE SQUASHES ALL OF THE REST

Grease and flour two 8 x 4 inch pans. Preheat oven to 325 degrees F (165 degrees C). Sift flour, salt, baking powder, soda, and cinnamon together in a bowl. Beat eggs, oil, vanilla, and sugar together in a large bowl. Add sifted ingredients to the creamed mixture, and beat well. Stir in zucchini and nuts until well combined. Pour batter into prepared pans. Bake for 40 to 60 minutes, or until tester inserted in the center comes out clean. Cool in pan on rack for 20 minutes. Remove bread from pan, and completely cool.

INGREDIENTS:

- 3 Cups All-Purpose Flour
- 1 tsp Salt
- 1 tsp Baking Soda
- 1 tsp Baking Powder
- 1 tbsp Ground Cinnamon
- 3 Eggs
- 1 Cup Vegetable Oil
- 2 1/4 Cups White Sugar
